We have made-to-measure solutions to fit any home

Shutters and blinds are an inspired choice for any style of home. Especially when you consider that they're just as beautiful when viewed from the outside as the inside and very easy to keep clean.

So whether you want privacy or light control, functionality or versatility, contemporary or period style we can provide shutters and blinds that will fit your needs perfectly.

Tier-on-tier shutters

Cafe style shutters

Shutters aren't just a beautiful choice, they're extremely practical one too. After all, they can be fitted to any style of window or patio door, including French and sliding doors, bay, box bays, sash, as well as unusual shapes too.

And all our shutters are engineered to counteract the timber's natural tendency to twist with the grain. This ensures they will not warp or distort. While mortise and tenon joints reinforce their longevity.

STEP 1 CHOOSE A TYPE OF SHUTTER

PLANTATION SHUTTERS

Our most popular type of shutters. Plantation (or louvred) shutters once again offer excellent control of both light and privacy without compromising on style.

This versatile shutter is suited to both contemporary and traditional interiors.

Choose Plantation shutters for:

- Insulation against light and noise
- Contemporary or traditional style
- Almost infinite control of natural light.

SOLID WOOD SHUTTERS

Solid wood panel shutters have a traditional feel to them and a timeless elegance. Many original solid wood shutters still grace the windows of period properties today.

Our solid wood shutters are available in 2 different styles, solid shaker and solid with a raised insert. Also available are solid base shutters with louvres above which make great room dividers.

Choose Solid Wood shutters for:

- Almost black out quality light insulation
- Period style
- Added feeling of security.

STEP 2 CHOOSE A SHUTTER STYLE

Plantation and Solid Wood shutters are available in the following styles:

Full Height

Our most popular choice of style

Offers endless variations ranging from solid wood bottom panels, top louvres, arches and special shapes to room dividers.

Cafe style

The best of both worlds
